Feedback report for St Edmunds Trust

Headway Suffolk Move of Premises in Bury St Edmunds

St Edmunds Trust kindly granted Headway Suffolk £5,030 in January 2015.

This was to help the brain injury charity with meeting the costs of adaptations to new and more suitable premises identified in Olding Road in Bury St Edmunds.

The works included installation of handrails on steps and on the accessible ramp at the entrance to the building to assist those clients with mobility and balance difficulties impaired as a result of their brain injury or neurological condition.

The grant also paid for four magnetic fire doors to meet with health and safety regulations and to enable more accessibility and independence for clients navigating within the premises.

A bespoke, domestic-style kitchen area within the main room was also funded by the grant. This has enabled clients to use the area as part of independent-living support, as well as baking activities that engages clients and increases their cookery skills and develops self-confidence for greater independent living.

The premises has been well-received by clients, existing and new, as well as professionals and colleagues.

This has enabled Headway Suffolk to offer more and varied activities to a greater number of people needing our support in a much more suitable environment.

This would not have been possible without the support of St Edmunds Trust.
